

UM725 Series

Bluetooth Private Text Messaging — Send messages over Marine Channels to other similarly capable radios.

25 Watt Fixed Mount Marine VHF Radios

The UM725GBT is the first marine radio to offer Bluetooth wireless text messaging using your smart phone to text with a similarly capable marine VHF radio. You and your crew will enjoy the privacy of texting boat-to-boat, rather than broadcasting over your radio for all the boats in your area to hear. No more cell phone texting drop-off when you reach the range of your land-based cell tower.

All the UM725 Series marine radios come packed with the latest features, including IPX8 submersible rating, NOAA Weather Channels, DSC Distress send and receive, and speaker microphone equipped.

With Bluetooth private text messaging, you'll finally be able to enjoy the peace and quiet of the open water again.
